900MHz Spread Spectrum wireless technology is superior for security applications because it provides the proven reliability of multiple frequency signal transmission and the high security of an encoded signal. Spread spectrum also provides more frequent supervisory communications between the control panel and sensor... a critical issue in the protection of lives and property!

- 4 programmable function buttons
 - each key can be programmed differently
- Commonly used functions include :
 - Stay Arming**to arm alarm system in the Stay mode. All perimeter zones will be armed – e.g., all window and door contacts – but the interior zones will remain inactive, allowing the premises to remain occupied without creating an alarm
 - Away Arming**to arm alarm system in the Away mode. Both the interior and exterior zones will be armed, allowing occupants to exit the premises
 - Disarm**to disarm alarm system. User does not have to enter an access code when using the key to disarm the system
 - Fire**to notify the central monitoring station of a fire condition
 - Auxiliary**to notify the central monitoring station of a non-medical emergency
 - Panic**to notify the central monitoring station of a situation requiring the police, such as a break-in
 - Automation Functions**...such as turning lights on/off, opening/closing and locking/unlocking doors etc.
- Operating temperature : 32 to 120°F (0 to 49°C)
- Dimensions : 2.73" L x 1.59" W x 0.89" D (6.9 x 4.0 x 2.3cm)
- Battery test feature allows user to test battery and receive visual indication on system keypad
- Up to 16 Key FOBs per system
- 3 A76 1.5V batteries (supplied)
